About Me

Results-driven Flutter Developer with 2+ years of experience building high performance, scalable cross-platform mobile applications. Strong expertise in Clean Architecture, REST API integration, and modern state management solutions like Riverpod and GetX. Proven ability to deliver production-ready apps in domains like eCommerce, LMS, on-demand services, rental solutions, and travel promotion platforms. Passionate about writing clean code and creating seamless user experiences.

Skills

Languages & Frameworks
Dart, Flutter, C, Python, Object-Oriented Programming (OOP), Data Structures & Algorithms

State Management
Getx, Riverpod

Architecture & Design Patterns
Singleton, Repository, Observer, MVC, MVVM, Clean Architecture

Tools & Technologies
Git, GitHub, GitLab, GitHub Actions (CI/CD)

Backend Integration
RESTful APIs, Firebase (Authentication, Firestore) , Push notifications, pusher messaging

App Deployment
Experienced in publishing apps on Google Play Store and Apple App Store Connect

Soft Skills
Strong communication (English & Bangla), Problem-solving mindset, Team collaboration, Quick learner and adaptable

Education

- Diploma of Computer Science and Technology, Feni Computer Institute. (**CGPA 3.73**)
- B.Sc. in Computer Science & Engineering(CSE) At Northern University, Dhaka.

Work Experience

Junior Software Engineer — **Jan 2024-Present**
Razinsoft limited

- Developed and maintained multiple production-level Flutter applications.
- Implemented scalable architecture (Clean Architecture, MVVM) for long-term maintainability.
- Integrated REST APIs and Firebase services (Auth, Firestore, Notifications).
- Used Riverpod and GetX for efficient and reactive state management.
- Collaborated with designers and backend developers to deliver pixel-perfect UI.
- Improved app performance and reduced bugs through debugging and optimization.
- Participated in app publishing on Google Play Store & Apple App Store.
- Followed best practices for code quality, version control, and CI/CD.

Projects

Ready eCommerce (Multi-Vendor App) ***[play store link]***
- Contributed to build a full-featured eCommerce app with multi-vendor support
- Implemented cart, checkout, and payment integration.
- Used REST API & Riverpod for efficient state management

Ready LMS (Learning Management System) ***[play store]***
- Contributed to LMS platform for online education
- Features: Course enrollment, video streaming, progress tracking
- Implemented using Clean Architecture for scalability

Number One Laundry App ***[play store link]***
- Developed an on-demand laundry service application
- Features: Order placement, pickup & delivery tracking, payment system
- Focused on smooth UX and real-time updates

Rentar Customer App ***[play store link]***
- Developed a rental service mobile application for customers
- Features: Property/service browsing, booking system, order tracking
- Integrated REST APIs and ensured smooth user experience

Travel Promotion App ***[play store link]***
- Built a travel promotion platform to showcase destinations and offers
- Features: Travel packages, promotional banners, user engagement
- Focused on attractive UI design and performance optimization
